The Best Laptops

Cassy Cooker

Most people own laptop computers. They're portable, and can fulfill all but the most extreme computing needs. But there are so many laptops on the market, it's hard to tell which one is right for you. To help you decide which you should buy, we've selected five of the best on the market.

MacBook Pro

Price: \$2,079.95 - \$2,199.00

The Apple MacBook Pro has been a staple of high-end laptops since the first version of the model was introduced in 2006. The new version, which was introduced this past spring, is markedly improved from the previous version.

As with past MacBook Pro models, this version is sleek and sturdy. It features a responsive touchpad for cursor control. Users can plug a mouse into one of the many USB ports for increased ease of control. However, a mouse cannot encompass the multitouch touchpad con-

trols that are unique to the MacBook Pro. For instance, a sweeping motion with four fingers will hide all active programs and call up the computer's application switcher. One new feature allows users to scroll up and down on their screen, like they would on an iPhone or iPad. The integrated multitouch controls are efficient and work seamlessly.

The most notable improvement over previous versions is the new Intel Core i7 processor, which is markedly faster and more efficient than the previous Intel Core 2 Duo processor. The new processor is also lightweight, and allows for a

longer battery time; the MacBook Pro can run for over four hours without battery charging.

The laptop's specifications are impressive. It boasts 4 gigabytes of RAM, a 1,440 x 900 pixel resolution for its 15-inch monitor, a 500 gigabyte hard drive, and a GeForce 330M video card, which should satisfy anybody not running high-end video games. Almost all of these specifications are upgradeable—for a nominal fee.

Overall, the Apple MacBook Pro is a powerful laptop that remains one of the top models of its class.

Sony Vaio Z series

Price: \$2,269.99 - \$2,279.99

The Sony Vaio laptops have been top-of-the-line models for years now, and the Z series is no exception. This industrially designed laptop features a raised, backlit and wide keyboard. It has built in wrist support for users who type for long periods of time, and even a fingerprint reader for users who want extra security.

One useful feature that the Vaio Z series has is a slide bar that allows users to switch between the laptop's two graphics cards. On the "speed" setting, the high-end GeForce 330M video card kicks in, but on "stamina,"
