Samsung r810c Finesse Review - Straight Talk

Although there are millions of people out there purchasing iPhones, few actually know how to make the best use out of them right away. If you're interested in an iPhone but have never used one before, this article may be helpful. Read this article to find out great iPhone tips.

When calling a person that you don't want to see your iPhone number, you can hide the caller ID. From the Settings menu, go to Phone>Show Caller ID/Off. You can also use it for a reminder of your phone's number in case you forget.

Most iPhone users spend a good deal of time browsing Mail or Safari, but they might not know how easy it is to save images from them. Simply touch the selected image you want to save, and then hold your finger there for a couple of seconds. A box will appear giving you the option of saving the selected image.

Your iPhone can be used to send valuable pictures to your family and/or friends. You can do this in two different ways. The image can be either saved and added as an email attachment, or uploaded through the Facebook application.

Tapping "cancel" allows you to save a draft of a message that you intend to finish later. You will immediately be given the option to save, cancel or avoid saving. By choosing to save the message, it will go into the Drafts folder. If you do not already have a folder for Drafts, the phone will automatically create one for you.

If an iPhone freezes up, you can easily perform a rest to get everything back in working order. You will want to press the home key and the sleep button at the same time. The phone will then shut down and restart as a signal that everything went well.

If you want to customize your alert tones on your iPhone, it is very simple. It's pretty simple to customize how your alert tone sounds. In the settings area, go to the sounds option. Select the alert you want to change. Finally, select "buy more tones".

Take better photos by using your volume button on your headset versus the button on your iPhone. It is possible to set the phone to utilize this button so that shaking is reduced. You could also use the length of the headset cord to take self-portrait from different angles.

straight talk iPhone If you happen to accidentally drop the iPhone in water, you should not try turning it on right away. Dry the outside well and allow the any internal water to dry overnight. Activating a wet phone can short circuit it permanently.

There's a good reason the iPhone has become so incredibly popular: it's incredible! When you have one of these devices, it lets you into a world with so many wonderful social and business opportunities. The helpful tips provided in this article can optimize an iPhone owner
